Resident Notification System

In the world we live in today, concerns about safety and security are paramount. The Residential Notification System (RNS) is a state-of-the-art communications support system offered by the Ferrara Management Group Inc. Through this innovative system, managers keep residents, owners, and employees informed in the event of emergencies or other critical situations within minutes. RNS delivers notifications of power outages, water shutdowns, or service interruptions (elevator, heat/air conditioning, pool status) instantly via voice, text, email, and social media messaging. While essential for issuing these alerts, RNS also allows residents to stay informed remotely about community events, meetings, and other important matters.

Please complete the form below to enroll in RNS.
